

Instructional Insert - Cedar Hot Tubs ordered factory pre-assembled

If your tub was ordered factory pre-assembled, the staves (wall pieces) have already been assembled to the floor and are held in place with the stainless steel retention bands.

However, take note that during transport and handling it is possible for the retention bands to become slightly loose due to wood drying/shrinkage and/or wood compression under force.

Please refer to the included Zen Bathworks Cedar Hot Tub - Assembly, Installation, & Maintenance Manual, especially to the Retention Bands Tightening section therein, and ensure the bands are still adequately tightened before filling your new hot tub.

Thank you for your purchase. Enjoy your Hot Tub!
